

The fastest route from requirements definition to end-user application

## **AXXUN Inc Named a 2009 FastTrack Company**

*AXXUN Inc is thrilled to be included in The Connecticut Technology Council's 2009 Class of FastTrack Companies*

The Connecticut Technology Council has selected its 2009 class of FastTrack companies. The 2009 picks are emerging Connecticut technology companies singled out as a select group of high potential companies likely to achieve significant revenue growth in the next year and beyond.

As a result, AXXUN Inc will be paired with mentors, introduced to investors as appropriate and assisted in the selection of screened service providers where needed. Selected companies were culled from a broader base of over 500 emerging technology companies in CTC's Innovation Pipeline Accelerator Program which serves start-ups and emerging tech companies. This is the third year that CTC has made FastTrack selections. Previous year companies have included Premise Corporation and Design2Launch, both of which grew to a stage where they purchased in the last year.

AXXUN Inc is a Stamford-based provider of an application development system and runtime engine, axxun™, that requires no coding, produces no code and allows the developer to build applications in any order. Applications are built and maintained in 1/10th the time it takes with any other system. Over 200 companies around the world in a variety of industries use axxun™ applications today.

The Connecticut Technology Council's FastTrack program is funded in part by the law firm of Edwards Angel Palmer & Dodge LLP. Other members of the Class of 2009 include Control Station, Inc., Core Informatics LLC, Geezeo, PageFad LLC, Retail Optimization Inc., RemoTv Inc., SeeClickFix, SyferLock Technology Corporation.
