

The fastest route from requirements definition to end-user application

AXXUN Inc has been designated a Connecticut Technology Council's 2009 Innovation Pipeline "Company to Watch"!

Join us on September 17 at the 2009 Cantor Colburn LLP Innovation and Entrepreneurship Summit & Pipeline Awards Ceremony!

As a "Company to Watch", AXXUN Inc will be exhibiting at the "Companies to Watch" Poster Fair that is part of the Cantor Colburn LLP Innovation and Entrepreneurship Summit & Pipeline Awards. AXXUN Inc has also been invited to participate in an Elevator Pitch Competition, which will allow us to briefly introduce AXXUN Inc to other attendees and for the Angel Capital Association's (ACA) Northeast Angel Investor Summit being held there that same day.

The Connecticut Technology Council has selected its 2009 class of FastTrack companies, including AXXUN Inc. 2009 picks are emerging Connecticut technology companies singled out as a select group of high potential companies likely to achieve significant revenue growth in the next year and beyond.

As a result, AXXUN Inc will be paired with mentors, introduced to investors as appropriate and assisted in the selection of screened service providers where needed. Selected companies were culled from a broader base of over 500 emerging technology companies in CTC's Innovation Pipeline Accelerator Program which serves start-ups and emerging tech companies.

AXXUN Inc is a Stamford-based provider of an application development system and runtime engine, axxun™, that requires no coding, produces no code and allows the developer to build applications in any order. Applications are built and maintained in 1/10th the time it takes with any other system. Over 200 companies around the world in a variety of industries use axxun™ applications today.
