

The fastest route from requirements definition to end-user application

## **AXXUN Inc has been designated a Connecticut Technology Council's 2010 "Company to Watch"!**

*AXXUN will be featured at the 2010 Cantor Colburn LLP Innovation and Entrepreneurship Summit!*

CTC recognizes that the Connecticut technology industry is populated with a multitude of emerging technology companies who deserve recognition beyond those who will be declared winners of the 2010 Innovation Pipeline Awards. Hence it is classifying all companies who apply and meet basic criteria as a "Company to Watch." This designation has been established to indicate that AXXUN Inc has an innovative technology product or service with the potential to capture market share. It affirms that our technology company, its offerings and its management team are on the road to product, market, and financial success.

"Companies to Watch" will be asked to exhibit in a poster fair at the 2010 Cantor Colburn LLP Innovation and Entrepreneurship Summit on September 30, 2010. The poster fair, which will serve as a mini-trade show for the technology companies selected, is a simple, uncomplicated way to introduce companies to investors and attendees at the event.

In attendance will be angel investors from Boston, New York, New Jersey and Philadelphia, as earlier in the day. This complementary event provides exhibiting "Companies to Watch" a unique opportunity to meet with investors.

AXXUN Inc is a Stamford-based provider of an application development system and runtime engine, axxun™, that requires no coding, produces no code and allows the developer to build applications in any order. Applications are built and maintained in 1/10th the time it takes with any other system. Over 200 companies around the world in a variety of industries use axxun™ applications today.
